Samsung Multimedia Telephone (SMT) Series Handsets

## Live in the world of tomorrow, today, with Samsung's Multimedia Telephone (SMT) Series Handsets

Introducing Samsung's new SMT range of stylish and ergonomic handsets. Each handset is designed to provide an exceptional multimedia communications experience by maximising the benefits of the latest developments in IP technology and audio quality. The SMT range delivers true business grade quality in all respects.

Samsung's SMT handset range ensures ease of use by offering large clear screens with associated soft keys that display intuitive, relevant information direct to your handset. Some of the many features include direct access to voice mail, call logs and system directories - all at the touch of a button.

### UC Dial

The UC dial interface allows users to easily change their presence status to one of three modes; In-Office, Out of Office or UC mode. This intelligent feature automatically indicates their presence or availability to other users, activates pre-set call routing options when they are unavailable and forwards calls to their voicemail or mobile.

## Samsung OfficeServ SMT UC Handsets

The large display UC handsets provide advanced UC collaboration features such as presence information, instant messaging, video\* (via USB camera) and audio and video recording\* either via the intuitive display on the handset or seamlessly integrated with the OfficeServ Communicator UC application on your PC. The UC handsets also utilise the open architecture of XML allowing access to the rich world of customised software applications by integrating the handset displays and soft keys. Your investment in Samsung IP technology is ready for the future as well as today.

With personalisation options such as uploadable polyphonic ring tones, screensavers\*, synchronized visual phone books, and call logs, your handset becomes more than just a phone. Customisation has never been more flexible, professional and efficient.

With striking design, intelligent ergonomics and an exciting new feature set, the SMT series range carries the industry recognition of the prestigious iF Communications Design Award and the Good Design Award.

### OfficeServ SMT-i5243 UC Handset
